About the Multiple Myeloma Research Foundation (MMRF)

The MMRF is the largest nonprofit in the world solely focused on accelerating a cure for each and every multiple myeloma patient. Central to our mission is our commitment to advancing health equity so that all myeloma patients can benefit from the scientific and clinical advances we pursue. Since our inception, the MMRF has committed over \$500 million for research, opened nearly 100 clinical trials, and helped bring 15+ FDA-approved therapies to market, which have tripled the life expectancy of myeloma patients.
